CONFIDENTIAL REPORT

Report: Customers with transactions but no active cards

Generated By: Bob Williams (manager)
Date: 2026-02-13 12:13:02

1. Executive Summary

Intent: Find customers who made transactions but have no active cards

Business Summary

The provided dataset contains information on 5 customers, including their customer ID, first name, and last name. The analysis aims to identify customers who have made transactions but do not have any active cards. However, the given dataset does not provide direct information on transactions or card status.

Key Metrics

- * Customer count: 5
- * Customer ID range: 16-20
- * Top last names: 'Butt' (2 occurrences)

Trend Analysis

The dataset lacks specific information on transactions and card status, making it challenging to identify the target customer segment directly. However, the data does provide a starting point for further investigation by listing the customers.

Recommendations

To accurately identify customers who have made transactions but do not have any active cards, we recommend:

- * Integrating transaction data with the provided customer dataset
- * Obtaining card status information for each customer
- * Conducting a thorough analysis of the combined dataset to identify the target customer segment and develop targeted strategies to address their needs.

2. Data Evidence

customer_id	first_name	last_name
19	Faisal	Malik
20	Rabia	Butt
17	Waseem	Qureshi
18	Amna	Khan
16	Sana	Butt
